# Introduction

## ***Purpose***

This report details changes to the Schools Online Thesaurus.

## ***Audience***

ScOT Consultative Group (ScOTCG) and other interested parties.

## ***Background***

Most changes in v6.1 arise from collection and analysis of data from Schools Cataloguing Information Service (SCIS) over the past year. SCIS cataloguers indicate subject gaps in ScOT as they arise by adding suggested terms to SCIS records. These terms are periodically exported and analysed by the thesaurus analyst and draft reference structures created for integration with ScOT. This release deals with a cluster of issues raised by SCIS cataloguers. More terms from this process will be added in future releases.

In providing candidate terms through cataloguing practice, SCIS has provided systematic and detailed feedback on the subject access requirements of a significant collection of educational resources.

Some candidate terms are not added in this release because relevant reference structures need first to be revised. The main branch is **Psychology**; including alignment and consolidation of Human behaviour, Emotions, Personality, Cognition, in order to add terms such as Bonding, Compassion, Deception, Revenge and Psychic ability;

Many proposed terms that logically belong to the **Religion** branch are not added because they are proper names. Further, a number of approved terms in the areas of religious festivals, art and music, and sacred texts are removed in version 6.1.

Maintenance level changes arising from various content projects are also outlined in this report.

## **Issues arising**

Some candidate terms arising from SCIS cataloguing do not conform to ScOT quality assurance specifications, even if they do indicate subject gaps. Where possible, these terms are used to develop compliant terms that share a semantic core and fill existing subject gaps. Examples are given in this section.

### ***Proper nouns for places***

Some terms are proper nouns for places or geographical features and do not comply with ScOT quality assurance specifications. However some of these point to subject gaps in ScOT; for example:

Bergen-Belsen (Concentration camp)

While this term is disqualified, the term “Concentration camp” has been added as a candidate.

Concentration camps

UF     *Death camps*  
          *Extermination camps*  
BT     Genocide  
RT     Prisoners of war

### ***Dates, events and groups.***

Some proposed terms are proper nouns for places or groups features and do not comply with ScOT quality assurance specifications. However some of these point to subject gaps in ScOT; for example:

Inquisition

*Instead:*

Heresy  
BT     Religion

Phoenicians

*Instead:*

Ancient civilisations  
BT     Civilisation  
RT     Ancient history

Further, a number of terms that describe instances or religious texts or practices are removed from ScOT, including Christian music, Christmas and Qur’an.

### ***Ethnic groupings and derivatives***

Terms compounded by geographical or ethnic modifiers are disqualified by ScOT quality assurance specifications. Examples of rejected terms include:

Hispanic Americans  
Icelandic myths  
Indian cooking  
Iranian Americans  
Irish in Australia

Note also that “Native Americans” is proposed for removal in v6.1.

## Statistics
