1.0 Introduction

1.1 Purpose

Detail changes to the Schools Online Thesaurus

1.2 Audience

ScOT Consultative Group and other interested parties.

2.0 Background

2.1 Approved and Modified terms

Changes proposed in ScOT v6.3 do not represent significant structural changes but are instead a compilation of terms used heavily by cataloguers.

Minor structural changes are proposed in order to accommodate new terms and clarify existing reference structures. Examples include “Carnivora”, under Placentals and parent to Bears, Civets and Mustelids; “Ancient history” which is parent to new term Iron Age but also existing terms Bronze Age and Prehistory; and several new and existing terms (re)located under “Water sports”.

2.2 Rejected terms

ScOT limits the number of compound descriptors and minimises terms representing events or occurrences. For more information, see the ScOT Specifications (Curriculum Corporation, 2006). The following categories of topic will not be added to ScOT:

- time periods
- literary awards and prizes (e.g. "Book of the Year Award")
- compound terms where the components can stand alone (e.g. "Hand in art", "Hindus in Australia", "Field crops and climate", "Flour and flour mills", "Women and Christianity")
- "language text" headings (e.g. "French language text")
- brand names (e.g. of cars, motorcycles, aeroplanes, computers)
- species of plants or animals, breeds of dogs, etc.
- individual legendary, mythical and fictional characters
- named events (e.g. "Battle of Trafalgar", "Newcastle earthquake")
- special days or years (e.g. "Mother's Day", "International Year of the Potato").

3.0 Statistics

Table 1 - Preferred, Non-preferred and Top terms

	5.0	6.0	6.3
Top Terms	8	10	10
Total terms	8,966	10,321	10,792
Preferred	7,083	7,666	7,569
Non-preferred	1,883	2,655	3,223
% Non-preferred	21%	25.7%	29.9%

A common question facing thesaurus developers is “how many levels”. Targets for hierarchy depth are sometimes arbitrarily assigned (e.g. “between 5 and 7”).

An alternative approach is to manage and report the proportion of terms at each level. Details of how many levels a thesaurus ‘drills down’ should be presented within the context of where most indexing terms are located.

Figure 1 shows changes between version 5.0, 6.0 and 6.3 with regard to the number of terms at each level. The graph shows little change at the second level or for levels 3 or 5. There is a spike of level 4 terms in version 6.3 which is due to approved candidate terms added to the existing structure.

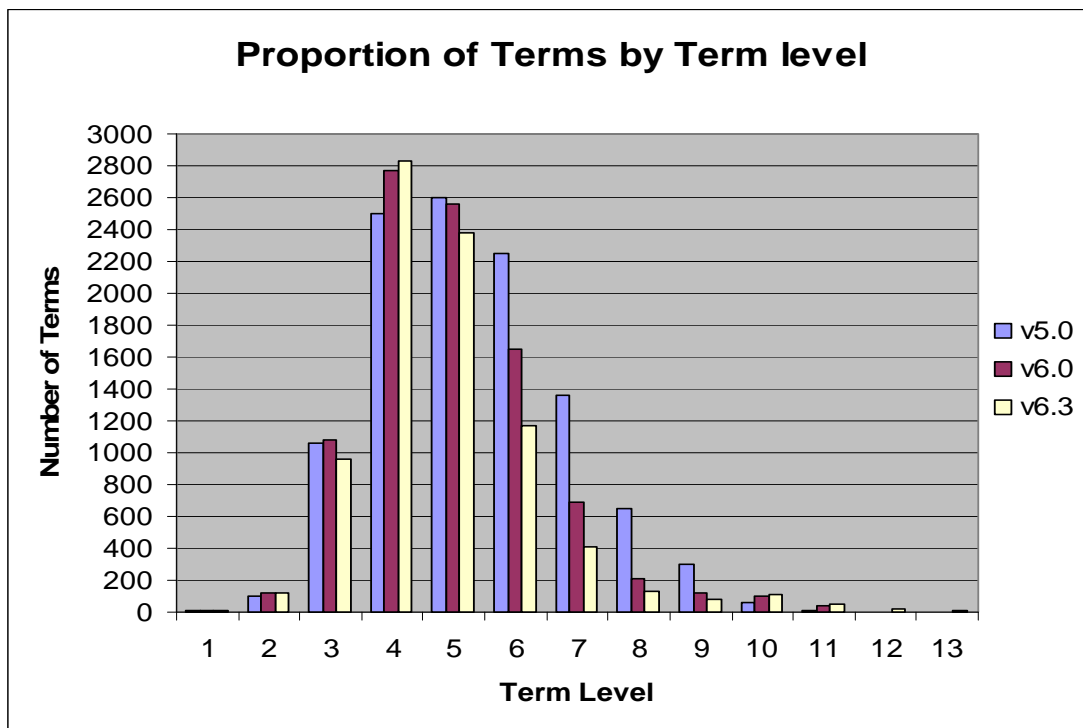

Figure 1 Proportion of terms by Term level

At level 6 and 7 there is a substantial decline in the number of terms. An increase in overall non-preferred terms partly accounts for a reduction in preferred terms at all levels.

In version 6.3, about 76% of terms fall within the top 5 levels. This compares with 74% in version 6.0 and 58% in 5.0. This represents a trend towards a more even triangular shape, where each term branches out to not-too-few but not-too-many narrow terms. Balancing the number of NT references for each term enhances browsing to relevant topics without limiting a multi-faceted approach to dividing concepts.

4.0 Approved terms

New terms approved in ScOT version 6.3.

5.0 Modified terms

Modified terms are terms that:

- Have USE or BT relationship added or removed;
- Are label changes; eg After school care changed to After-school care; or
- Have addition, modification or removal of Scope notes

Changes are not detailed for addition or removal of NT, UF or RT. Note also that terms with status changed to 'Not valid' are detailed separately.

Aboriginal history

CN: 6.3 - BT History removed, BT World history added.

BT: World history

NT: Stolen generations

RT: Aboriginal culture

Dispossession

Precontact culture

Reconciliation

Shared history

American history

CN: 6.3 - BT History removed, BT World history added.

7.0 Hidden labels

Hidden labels (HL) are non-preferred terms that are not meant for display. The reciprocal relationship to HL is MR, or 'Machine Read to'. The HL/MR relationship controls spelling of irregular plurals, plurals within compound terms and one-word versus two-word variants. Hidden labels enhance search engine indexing but do not add scope to the meaning of the preferred term and so are not displayed.

Hidden labels will not be reported in Quality Assurance Summary Reports. Some Hidden labels added in 6.3 are given below by way of illustration.

Liquorice
MR: Licorice

Mongeeese
MR: Mongooses

Paper planes
MR: Paper aeroplanes

Pianoconcertos
MR: Piano concertos

Plateaux
MR: Plateaus

Prisoner of war
MR: Prisoners of war
