Introduction

This report outlines enhancements to the Schools Online Thesaurus (ScOT) between July 2012 and June 2013. Selected ScOT project activities are also highlighted, including website changes and expansion of multi-lingual reference structures. In addition to this document, users may generate reports of new, modified or deprecated concepts over a defined period at the ScOT website¹.

¹ <http://scot.curriculum.edu.au/releases.asp>

Highlights

Vocabulary alignment

ScOTv6.8 supports alignment of education resources with curriculum frameworks. A key activity to this is using ScOT to profile curriculum itself - ScOT is now the mandated indexing vocabulary for Australian Curriculum Content descriptions.

Australian Curriculum

ScOTv6.8 aligns closely with the Australian Curriculum while retaining reference structures and word stock built up over 10 years of consultation with the school sector and via application to many substantial content projects. In turn, ScOT has been applied to the Australian Curriculum itself and continues to be the mandated subject vocabulary for tagging machine-readable descriptions of the Australian Curriculum. Curriculum metadata is used to link ScOT concepts to curriculum published on the semantic web.

By assigning ScOT to curriculum resources, inferences between specific curriculum elements and resources can be made. Tools have been developed that leverage the common use of ScOT in curriculum frameworks and resources (see API / Web-services below). Significant resource projects that apply ScOT concepts include Supporting the Australian Curriculum On-Line (SACOL) project and Schools Catalogue Information Service (SCIS).

In the last year, ScOT has been enhanced with concepts from the recently published Geography curriculum, as well as from senior curriculum for Mathematics, History, Science and English. As the Languages curriculum is rolled out, concepts from various subjects such as Chinese and Italian have also provided warrant for new concepts and changes.

ScOT is now embedded in the Australian Cross-curriculum Priority vocabulary, to support search features.

Resource projects

New concepts and modifications often arise from catalogue feedback. ScOT continues to develop as it is exposed to significant content projects including SACOL and SCIS. Reports from metadata creation and retrieval systems are used to identify catalogue feedback and end-user search behaviour. These content projects are an important source of user and literary warrant and form strong cases for additional concepts and other modification to ScOT.

API / Web-services

New sample code located on the SPARQL page, including

- Federated **SPARQL**² query, that uses ScOT and Australian Curriculum data and supports **Curriculum Connect** applications

² <http://vocabulary.curriculum.edu.au/PoolParty/sparql/scot>

- A **RESTful API**³ was also launched
- **ScOT synonym ring**⁴ that supports Google Custom Search Engine
- **JSON-LD as additional export format.**

Curriculum Connect

ScOT guidelines for cataloguers are now supported by a new tool⁵ that retrieves Australian Curriculum Content descriptions associated with ScOT concepts and/or concepts linked via the ScOT hierarchy. It supports expansive linking between ScOT tags and curriculum.

Language support

In 2010-2011 the National Asian Languages and Studies in Schools Program (NALSSP) funded ScOT alignment with the priority languages of Chinese, Indonesian, Japanese and Korean. In late 2012 the Australian in the Asian Century⁶ paper stated these priorities as Chinese, Indonesian, Japanese and Hindi.

In response to, and with funding from the NALSSP program, a high level slice of ScOT was translated into non-English languages for the first time. Approximately 1,900 concepts have been translated into Chinese; 1300 Japanese; 1100 Indonesian, and 900 Korean. These concepts were reviewed by curriculum and language experts.

In addition, selected priority concepts have been translated using Wikipedia⁷ in the following ACARA priority languages: Arabic (553); French (384); German (382); Spanish (375); Hindi (312); Italian (346); Greek (346); Turkish (344); Vietnamese (333).

Access to ScOT in these languages supports a number of use cases:

- International exposure/ new markets
- Background-language learners can retrieve resources in mainstream portals
- Second language learners scaffold learning to the search experience
- Teachers selecting resources for Language curriculum
- Cataloguing support for non-English based agencies

⁵ <http://scot.curriculum.edu.au/indexing.asp>

⁶ <http://asiancentury.dpmc.gov.au/white-paper/chapter-6/the-capability-of-australias-people-and-institutions>

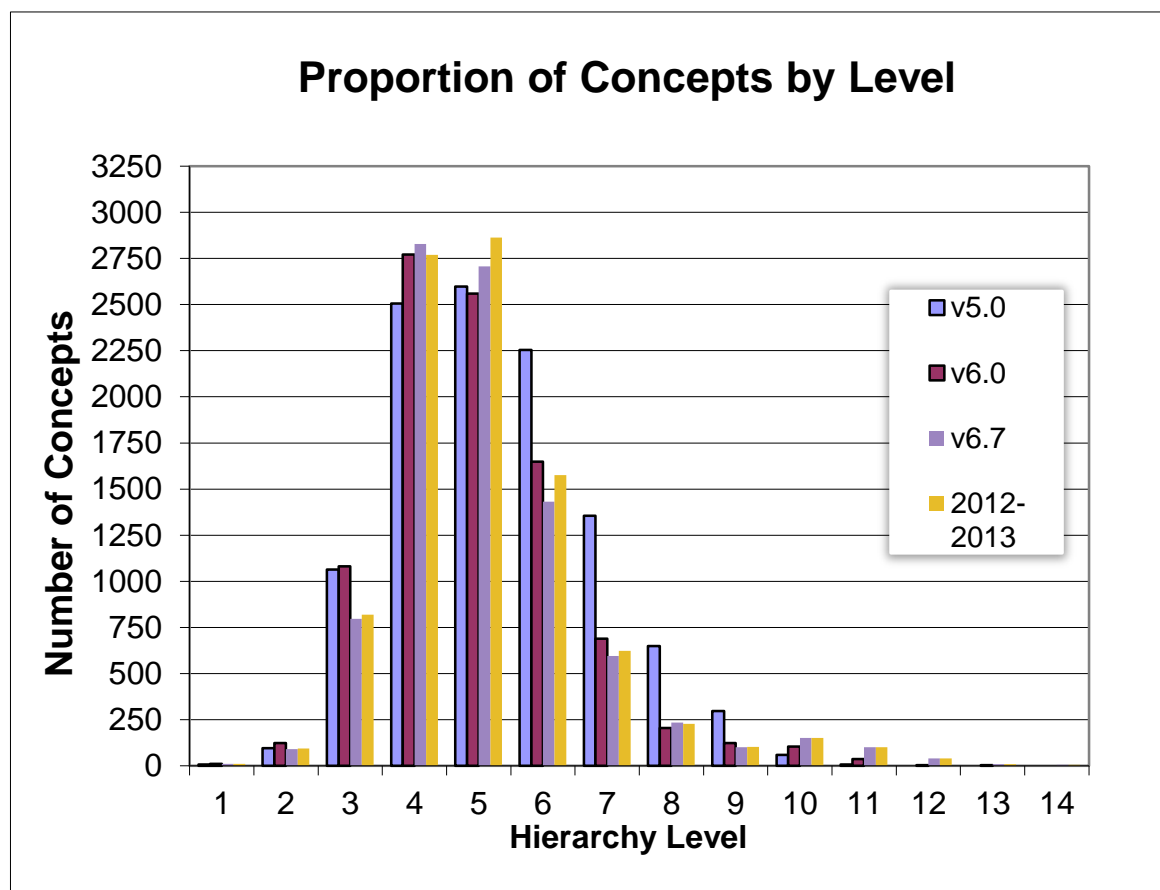

⁷ As yet reviewed by language curriculum experts

Statistics

Proportion of concepts by level

A common issue for thesaurus management is how many levels should be in the hierarchy. This, together with the number of 'top terms' together indicate the depth and breadth of concepts covered. Thesaurus dimensions should match the breadth, specificity and complexity of concepts located in user content. User interface issues are also a consideration; the ten ScOT Top Terms are a good starting point for top-down browsing both in the public thesaurus interface and within vertical navigation or breadcrumb systems⁸.

Targets for hierarchy depth are sometimes arbitrarily assigned in thesaurus management guidelines (e.g. between 5 and 7). Another approach is to manage and report the proportion of concepts at each level.

⁸ See "Browse Thesaurus" at <http://scot.curriculum.edu.au>; "Browse by" at <http://www.scootle.edu.au>

Concepts at each hierarchy level

Level	v.5.0	v6.0	v6.3	v6.4	v6.5	v6.6	v6.7	v6.8
1	8	10	10	10	10	10	10	10
2	96	123	119	160	99	97	91	94
3	1064	1081	964	944	893	900	796	819
4	2505	2771	2829	2847	2813	2858	2829	2769
5	2597	2560	2378	2412	2529	2566	2707	2863
6	2254	1648	1167	1183	1268	1315	1431	1575
7	1356	690	408	416	460	472	596	623
8	649	206	134	150	163	165	234	228
9	297	124	78	79	90	90	101	103
10	60	105	106	192	149	160	151	152
11	7	37	54		84	80	101	101
12		4	22		32	33	41	41
13		4	7		6	6	9	9
						3	5	5
% top 5	57.56%	74.06%	76.12%	75.93%	73.8%	73.46%	70.68%	69.79%
% top 6	78.25%	92.70%	90.22%	90.03%	88.55%	88.48%	86.40%	86.56%

Alternative labels per concept

There is one Preferred label (in English) for each concepts in ScOT. For any concept there are optionally one to many Alternative labels⁹ (also called non-preferred terms). Alternative labels increase entry to concepts by managing ambiguity between synonymous or near-synonymous concepts. In ScOTv6.8, the proportion of alt labels has increased dramatically from 40% to 85%. This is accounted for mainly by addition of new alt labels for existing concepts, especially to provide semantic mapping from Australian Curriculum language.

	v5.0	v6.0	v6.3	v6.4	v.6.5	v6.6	v6.7	v6.8
Concepts	7,083	7,666	7,569	7,568	7,856	8,019	8,282	8,677
Alternative labels	1,883	2,655	3,223	3,554	4,193	4,808	5,603	7,377
Alternative %	21%	25.7%	29.9%	32%	34.8%	37.5%	40.4%	85%

⁹ A smaller but growing number of 'Hidden labels' are not included in the table. The skos:hiddenLabel element is used for lexical variants such as misspellings.

Diplomacy

URI: <http://vocabulary.curriculum.edu.au/scot/5121>
CN: Changed from Diplomats to Diplomacy. [2013-06-03T05:53:16Z]
UF: Brinkmanship
Diplomats
Soft power
BT: International relations
RT: Negotiation
Politicians

Dipoles

URI: <http://vocabulary.curriculum.edu.au/scot/9453>
CN: Removed BT Bonding (Chemistry), added BT Molecular forces. [2013-02-21T02:15:36Z]
BT: Molecular forces
RT: Electronegativity
Magnetic moments

Disarmament

URI: <http://vocabulary.curriculum.edu.au/scot/5154>
CN: Removed BT Peace, added BT Military equipment. [2013-06-04T02:00:40Z]
BT: Military equipment
RT: Weapons

Discrimination

URI: <http://vocabulary.curriculum.edu.au/scot/752>
CN: Changed scope note. [2013-06-04T02:01:18Z]
BT Human relations removed, BT Discrimination added. [2008-09-17T02:00:00Z]
BT Equality added. [2006-02-13T01:00:00Z]
SN: Use for resources about unfavourable treatment of individuals or groups on arbitrary grounds.
UF: Victimization
BT: Social equality
NT: Age discrimination

Disability discrimination
Gender discrimination
Political discrimination
Racial discrimination
Religious discrimination
Social discrimination
RT: Affirmative action
Alienation
Crime
Sexual harassment
Social justice

Dispersed settlements

URI: <http://vocabulary.curriculum.edu.au/scot/5184>
CN: BT Settlement patterns removed, BT Rural areas added. [2012-12-17T00:22:33Z]
UF: Diasporas
BT: Rural areas
RT: Jewish peoples

Dissonances (Sonic devices)

URI: <http://vocabulary.curriculum.edu.au/scot/5189>
CN: Changed from Dissonance to Dissonance (Sonic devices). BT Literary devices removed, BT Sonic devices added. [2013-01-11T05:48:37Z]
BT: Sonic devices

Docks (Structures)

URI: <http://vocabulary.curriculum.edu.au/scot/9055>
CN: Changed from Ports to Docks (Structures). Removed BT Marine engineering, added BT Nonbuilding structures. [2012-12-17T22:38:43Z]
BT Places removed, BT Marine engineering added. [2007-05-28T02:00:00Z]
UF: Ports
BT: Nonbuilding structures
RT: Harbours

Dot maps

URI: <http://vocabulary.curriculum.edu.au/scot/5244>
CN: Changed from Dot symbol maps to Dot maps. [2012-12-17T22:40:03Z]
BT Maps removed, BT Thematic maps added. [2009-07-17T02:00:00Z]
UF: Dot density maps
Dot distribution maps
Dot symbol maps
BT: Thematic maps

Drainage

URI: <http://vocabulary.curriculum.edu.au/scot/5253>
 CN: Removed BT Stormwater, Added BT Groundwater. [2012-12-17T22:51:52Z]

BT Water supply removed, BT Stormwater added. [2007-05-28T02:00:00Z]

UF: Storm drains

BT: Groundwater

RT: Geological basins

Irrigation

Surface runoff

Drainage basins
