## Introduction

This report outlines enhancements to the Schools Online Thesaurus (ScOT) between July 2013 and June 2014. Selected ScOT project activities are also highlighted, including website changes and expansion of multi-lingual reference structures. In addition to this document, users may generate reports of new, modified or deprecated concepts over a defined period at the ScOT website<sup>1</sup>.

---

<sup>1</sup> <http://scot.curriculum.edu.au/releases.asp>

## Highlights

### Australian Education Vocabularies

ScOT is one of a number of controlled vocabularies managed by Education Services Australia (ESA). ScOT remains the largest, longest serving and widely purposed vocabulary with dedicated logo and branding. However the other vocabularies are used in various metadata applications and require maintenance. There are also several new vocabularies added to the server over 2013-2014.

### Australian Curriculum

On behalf of Australian Curriculum Assessment and Reporting Authority (ACARA), ESA hosts four projects.

- [Australian Curriculum Framework](#) – represents the high level structure of the whole curriculum.
- [Australian Cross-curriculum Priority](#) – provides definitions to support the machine readable Australian Curriculum
- [Australian General Capability](#) – provides definitions to support the machine readable Australian Curriculum
- [Language modes](#) – provides definitions for the English curriculum

As well as providing stable definitions for the curriculum scheme, each of these vocabularies can be quoted in education resource metadata. Using these vocabularies in resource metadata strengthens the alignment between resources and curriculum frameworks and objectives.

ScOT has also been updated to more closely align with the language of the other vocabularies – for example top concept ‘Technology’ changed to ‘Technologies’, consistent with Australian Curriculum language. In the last year, ScOT has been enhanced with new concepts and modified labels to reflect the recently published curriculum for The Arts; Civics and Citizenship; Technologies; Economics and Business; Health and Physical Education.

### Teacher Standards

A late development in 2013 – 2014 is the reboot of the *Australian Professional Standards for Teachers* (‘Teacher Standards’), now hosted on the Australian Education Vocabularies server and on behalf of Australian Institute for Teaching and School Leadership (AITSL). The work of profiling the Teacher Standards with ScOT concepts is also underway.

The Teacher career stage vocabulary was also added during 2013-2014.

- [Teacher career stage](#) – defining teacher’s professional expertise stages
- [Australian Professional Standards for Teachers](#) – articulate what teachers are expected to know and do throughout the career stages

As with the Australian Curriculum vocabularies, the teacher standards and career stages can be quoted in education resource metadata, thereby aligning resources to specific user needs.

### **Education Services Australia vocabularies**

As well as *Schools Online thesaurus (ScOT)*, several small vocabularies are hosted and authored by ESA. They are:

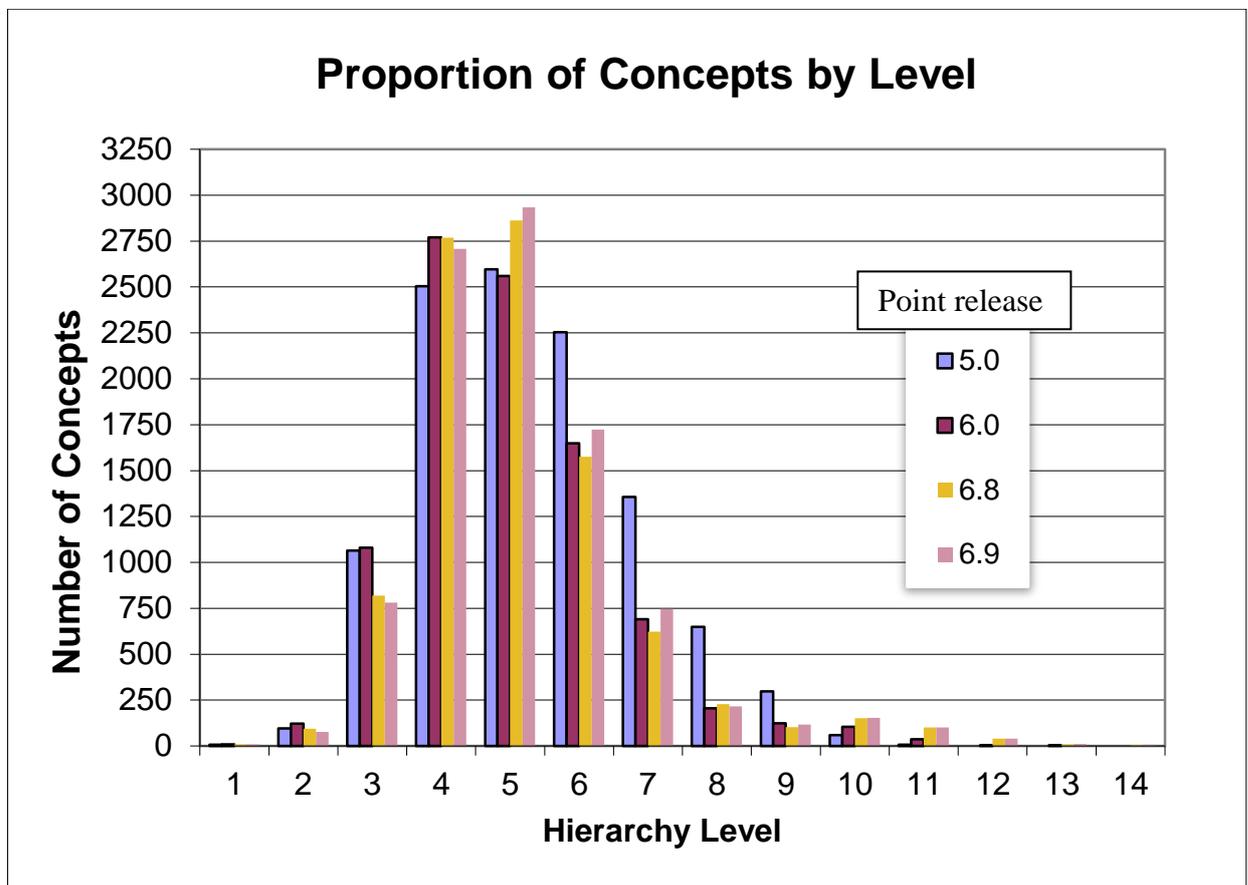

- [Australian Access Profile](#) – identifies the accessibility of learning content
- [Australian Learning Resource Type](#) – and extension of the widely used DCMI Type vocabulary
- [Australian School Level](#)
- [Australian Student Activity](#)
- [Technical Requirement](#) – the browsers, operating systems and plug-ins required to make learning content work

## Statistics

### Proportion of concepts by level

The number of levels that make up the ScOT hierarchy, together with the number of branches under top concepts indicate the depth and breadth of concepts covered. Thesaurus dimensions should match the breadth, specificity and complexity of concepts located in user content. User interface issues are also a consideration; the ten ScOT top concepts are a good starting point for top-down browsing both in the public thesaurus interface and within vertical navigation or breadcrumb systems<sup>2</sup>.

Targets for hierarchy depth are sometimes arbitrarily assigned in thesaurus management guidelines (e.g. between 5 and 7). Another approach is to manage and report the proportion of concepts at each level.

<sup>2</sup> See Browse Thesaurus at <http://scot.curriculum.edu.au>; Browse by at <http://www.scotole.edu.au>

### Concepts at each hierarchy level

Level	v.5.0	v6.0	v6.3	v6.4	v6.5	v6.6	v6.7	v6.8	v6.9
<b>1</b>	8	10	10	10	10	10	10	10	<b>10</b>
<b>2</b>	96	123	119	160	99	97	91	94	<b>77</b>
<b>3</b>	1064	1081	964	944	893	900	796	819	<b>782</b>
<b>4</b>	2505	2771	2829	2847	2813	2858	2829	2769	<b>2707</b>
<b>5</b>	2597	2560	2378	2412	2529	2566	2707	2863	<b>2933</b>
<b>6</b>	2254	1648	1167	1183	1268	1315	1431	1575	<b>1724</b>
<b>7</b>	1356	690	408	416	460	472	596	623	<b>747</b>
<b>8</b>	649	206	134	150	163	165	234	228	<b>216</b>
<b>9</b>	297	124	78	79	90	90	101	103	<b>117</b>
<b>10</b>	60	105	106	192	149	160	151	152	<b>153</b>
<b>11</b>	7	37	54		84	80	101	101	<b>101</b>
<b>12</b>		4	22		32	33	41	41	<b>41</b>
<b>13</b>		4	7		6	6	9	9	<b>11</b>
						3	5	5	<b>7</b>
<b>% top 5</b>	57.56	74.06	76.12	75.93	73.8	73.46	70.68	69.79	<b>67.61</b>
<b>% top 6</b>	78.25	92.70	90.22	90.03	88.55	88.48	86.40	86.56	<b>85.52</b>

### Alternative labels per concept

There is one Preferred label (in English) for each concepts in ScOT. For any concept there are optionally one to many Alternative labels<sup>3</sup> (also called non-preferred terms). Alternative labels increase entry to concepts by managing ambiguity between synonymous or near-synonymous concepts. In ScOTv6.9, the proportion of alt labels has continued to steadily increase from 85% to 88%. This is accounted for mainly by addition of new alt labels for existing concepts, especially to provide semantic mapping from Australian Curriculum language.

	v5.0	v6.0	v6.3	v6.4	v.6.5	v6.6	v6.7	v6.8	V6.9
Concepts	7,083	7,666	7,569	7,568	7,856	8,019	8,282	8,677	<b>9287</b>
Alternative labels	1,883	2,655	3,223	3,554	4,193	4,808	5,603	7,377	<b>8219</b>
Alternative %	21%	25.7%	29.9%	32%	34.8%	37.5%	40.4%	85%	<b>88%</b>

<sup>3</sup> A smaller but growing number of 'Hidden labels' are not included in the table. The skos:hiddenLabel element is used for lexical variants such as misspellings.

## New concepts

<b>Code</b>	<b>Meaning</b>	<b>skos equivalent</b>
